Work Experience

Flutter Developer Round Tech Square

November 2021 - February 2022
July 2022 - Present
Vadodara, India

Developing Crypto-trading mobile app, which generates profits automatically with the help of high-frequency robots. Contributed to APIs integration and UI/UX development.

Projects

Trippy - Trip Made Easy

This app is a Travel Planner which mainly deals with the issue of being able to translate text from pictures and has extra features related to traveling, like a Budget Planner, Weather Forecast, Currency Converter, To-Do List etc.

Chat App

In this app I have used Firebase Cloud Firestore as well as the Firebase authentication package to equip our app with a cloud-based NoSQL database and secure authentication methods.

Crypto Coin Tracker

Keep track of some crypto coins in one app! Live crypto price alerts and so much. Use Coin API to fetch live data.

Weather App

This is one of best weather apps with feature like: Local weather, hourly forecast and daily forecast. In this app, I have used OpenWeather API to fetch live data.

BMI Calculator

The Body Mass Index(BMI) Calculator was inspired by the beautiful designs made by Ruben Vaalt. It is a 2-screen app with simple functionality and full-on custom styling.
